

# Velocity Cloud Backup

*Keep up to date with Cloud Backup*

The automated back up system is an optional extra that comes with Velocity; it provides fully automatic cloud based back up for your precious data on a daily basis.

There is no need to run a back up, and save the file on your USB stick or external hard drive, we can take care of this for you with our automated service.

The system will automatically back up your system everyday; it makes a copy on your PC and sends a copy to our cloud storage for safe keeping.

The data is kept for 10 days so if you ever need to revert back to a previous point in time, you can. You will receive an email every morning letting you know if the back worked and that your data is safe.

- Automatic daily cloud back up
- Historical back up files kept for 10 days
- No need to keep files on USB or external hard drives
- Peace of mind that your data is safe
- Pro-active monitoring in case your system fails to back up
- Daily email notification of your back up status

**Be safe in the knowledge that your data is backed up!**
